

As a customer of XM Radio, I believe that the hr 4026 bill is unjust. The FCC monitoring XM Radio contradicts the whole purpose of XM. XM Radio is a subscribed service and should be controlled by XM Radio and what its customers want out of its services. XM Radio conducts business in a fair and ethical manner, and the government should focus on the real issues this country is facing. Once again I strongly oppose hr 4026. Sincerely,

Amy
